

Apet[®]360Pro[™] Procurement Portal User Guide 32

360ProPlus - eTendering

Background

Jobs can be released to selected regions or nationally, on request or automatically. The Adcom feature is 'switched on' by 360Pro's super-user on a client-by-client basis.

Adcom may attract a small increase in 360Pro's annual subscription.

With Adcom switched on and enabled for a Job, users will be required to nominate the industry and location relevant to the Job through a new Promotions tab.

Promoting a Job

- By default, when a new job is created or imported in 360Pro, the 'Promote by Region' and 'Promote by Industry' will be switched on (to switch it off after a job has been created or imported, click Edit on the Job Info tab and change both settings to 'No').
- **2.** To set your promotion preferences, click on the Promotions tab.
